Alliance

KSMTA FreightMath Alliance Membership Directory

October 2025

About the KSMTA FreightMath Alliance

Trucking is a business of decimal places. In order to make better decisions, it's imperative that leaders work with a complete and accurate picture of their trucking operations. The mission of the KSMTA FreightMath Alliance is to enhance the technological sophistication of the analytics professionals that choose to join KSMTA FreightMath Alliance.

KSMTA FreightMath Alliance will provide a conduit to:

- Share proven data analytics strategies and techniques with a deep focus on trucking or transportation specific problems or opportunities.
- Become a trusted resource for leading-edge tech strategy, application vetting, and implementation.
- Identify trends with respect to industry software applications and hardware.
- Identify common measurements to enhance the transparency and profitability of the companies we serve.
- KSMTA FreightMath Alliance is restricted to data and analytics professionals within transportation companies and those transitioning into these roles.
