Safety & Risk Management Resources

*Leading the Trucking Industry in
Safety Training and Accident Prevention
on behalf of our customers since 1971.*

Safety Services

At Marvin Johnson & Associates, we strive to provide exceptional service to our valued clientele. Part of this service is in the area of Safety and Loss Prevention. Marvin Johnson and Associates has its own in-house safety and loss prevention department with real world trucking experience. We have sat in your “seat”, and understand the challenges you face everyday. Our staff members have over 100 years of combined experience in trucking and insurance loss prevention. In addition, all of our Loss Prevention Representatives have earned Certified Director of Safety (CDS) designation from the North American Transportation Management Institute (NATMI). We firmly believe that an educated driver is a safer driver. Our goal is to help our customers educate all of their drivers as well as other employees in the mindset of safety. We realize that safety is not a tangible object that can be touched or seen, but an attitude that must be cultivated throughout the company. Our goal is to give our customers the tools and assistance needed to cultivate that mindset and make it flourish.

We look forward to working with you in the future to help reduce your fleet’s losses and increase the organization’s profitability. Consider us as a resource that is here to assist you with all of your safety and compliance needs.
